## Mixed-mode instructions

**Definition**

Mixed-mode delivery refers to provider-based aspects (including provider-based: extramural) of otherwise work-based training arrangements, eg. block courses or night classes.

This template must be completed by TEOs that submit data through the Industry Training Register (ITR) if any of the learners undertake provider-based learning as part of their work-based training programme.

The provider-based learning must be submitted to the TEC via the Single Data Return (SDR), under source of funding (SOF) 11.

The work-based learning must be submitted to TEC via the Industry Training Register (ITR) reporting system.

The data in this template will enable the TEC to match the data from the SDR with the relevant data in the ITR. This will enable to correct recognition of the volume and value of delivery in work-based and provider-based respectively.

- This template will accept multiple SDR Provider-based EDUMIS codes.

For more information on modes of delivery, please refer to the TEC website [here](here).

## Data required

**ITR - Programme course number (dropdown)**

Please select the ITR Programme course number.

**SDR Provider-based EDUMIS**

Please enter the EDUMIS (TEO) code for the TEO that is submitting the provider-based learning through their SDR.

**SDR Provider-based Qualification Code**

Please enter the qualification code that is being used for the provider-based learning that is submitted via the SDR.  This must be the qualification code used by the SDR submitter to report data through to the TEC.

- On submission, this template will check the combination of **SDR Provider-based EDUMIS and SDR Provider-based Qualification Code**
