

State-Sector Guidance on Seismic Risk

- Cabinet has instructed the Property Management Centre of Expertise (PMCoE) to co-ordinate efforts across public sector related to seismic risk.
- New and rapidly evolving work-programme in early stages.
- PMCoE's mandate extends across state sector (including TEIs) and involves:
 - Guidance on the assessment process that will inform decisions on any actions required to address any seismic risks.
 - Collation of information that will inform reporting on the scope of potential seismic issues across the portfolio, and policy development.
 - Assistance with the procurement of any technical assessment services required to minimise costs and administration.

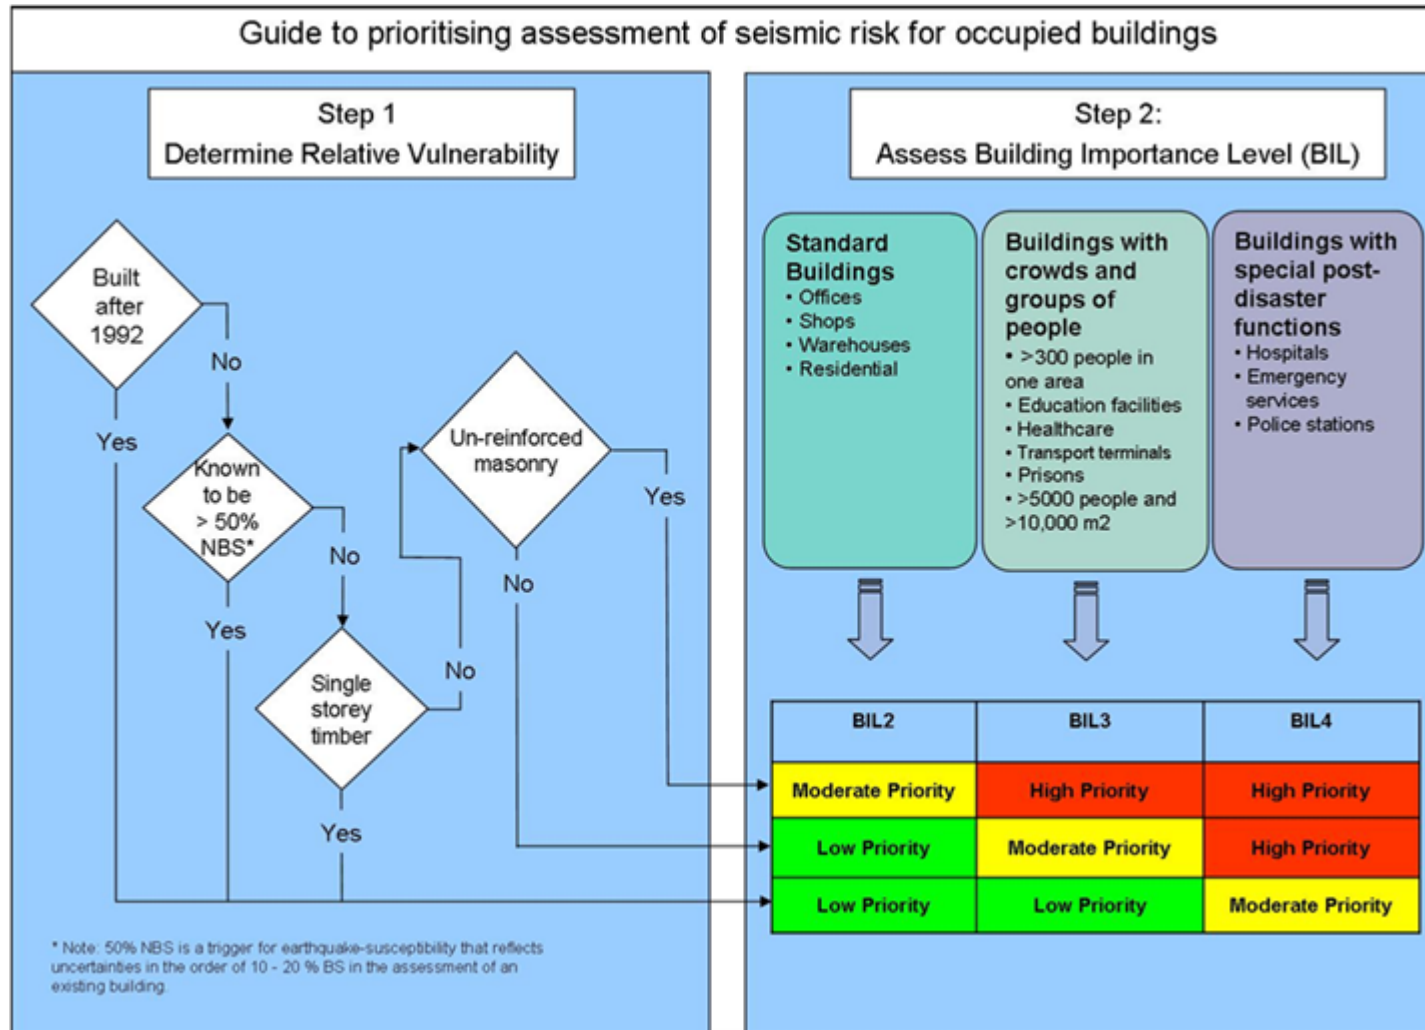

Impact on Tertiary Education Sector

- Individual institutions should continue to evaluate all structures (leased and owned) for seismic risk.
- Guidance will be published on the TEC's website.
- If risk already reviewed, institutions are asked to compare approach to that listed on TEC's website (see overleaf).

Seismic Risk Desktop Review

Co-ordination in tertiary education sector

- TEC will co-ordinate collection and response to PMCoE.
- Data requested as part of 2012 CAM return broken down as % of each category (i.e. low, moderate, high) by building NBV (not individual building level).
- Questions or comments can be sent to CAMenquiries@tec.govt.nz
